INTERVIEW QUESTIONNAIRE

A. Managers and Supervisors

Theme 1: Perception

1. How would you describe the security culture in your organization?

Theme 2: Leadership and Governance

2. How do leaders support or model secure behavior for staff?
3. How are security incidents or mistakes handled and followed up?

Theme 3: Communication and Training

4. Besides formal training, what other methods remind staff about security (e.g., emails, meetings, posters)?
5. How do you check whether training or reminders actually change behavior?

Theme 4: Technical Oversight and Measurement

6. What technical controls (e.g., VPN, firewall, monitoring) does the organization use, and how are they reviewed?
7. Do you receive regular security status updates? From whom and how often?
8. What KPIs or indicators (if any) do you use to track security behavior?

Closing / Improvement

9. How is employee feedback about security improvements handled?
10. In your view, which area of security culture needs the most improvement and why?

B. Technical Staff (IT / Security)

Theme 1: Support and Enforcement

1. How does your team support employees to follow safe security practices?
2. What risky behaviors do you commonly see among staff?

Theme 2: Tools and Monitoring

3. Are tools like firewalls, VPNs, and endpoint protection properly implemented and updated? How do you ensure this?
4. How do you monitor for suspicious activity or policy violations?

Theme 3: Incident Response and Learning

5. When an incident or human mistake occurs, how does your team respond and share lessons learned?
6. How quickly can you typically respond to an alert or suspicious event?

Theme 4: Cooperation and Usability

7. How well do non-technical teams cooperate with technical controls (e.g., MFA, password policies, software updates)?
8. How much do you consider user experience when implementing security tools?

Closing / Improvement

9. Do staff feel comfortable reporting issues to the security team? Why or why not?
10. What one change would most improve security behavior across the organization?

C. Non-Technical / General Employees

Theme 1: Understanding and Awareness

1. What does “information security” mean to you at work?
2. How often do you receive reminders or updates about security?

Theme 2: Daily Practices and Tools

3. Do training and reminders help you follow secure practices in daily tasks? How?
4. Do you use secure tools (e.g., VPN, MFA, secure file sharing) when required? If not, why?

Theme 3: Reporting and Culture

5. Do you feel comfortable reporting a security mistake or suspicious activity? Why or why not?
6. When you see someone ignore a rule, what usually happens?

Theme 4: Barriers and Motivation

7. Have security rules or tools ever made your job difficult? Give an example.
8. What motivates you to follow security practices at work?

Closing / Improvement

9. Do employees get recognition for good security behavior?
10. What one thing (besides training) would make you and your colleagues take security more seriously?
